

SWADHYAY NATIONAL ENVIRONMENTAL QUIZ COMPETITION (SNEQC) 2026-27. 2nd Edition

QUESTION BANK No- 3

School Level | for Class 6th – 8th | 100 Multiple Choice Questions

Theme: Environment & Sustainability

Topics: Global Warming | Renewable Energy | Pollution & Waste Management | Tree Plantation | Wildlife Conservation | Sustainable Living | Water Conservation

Instructions for Students:

1. Paper – 3 contains 100 questions with answers.
2. The online quiz will consist of 25 questions, which will be selected randomly from this paper.
3. Students are advised to prepare thoroughly from Paper – 3 to ensure better performance in the online quiz.
4. The competition will progress from School Level to National Level, providing students an opportunity to represent their school at higher stages.
5. **Reappearance in Quiz by student would be considered as disqualification of student.**

Standard of Procedure (SOP) for conducting the on line exam. for School:

1. This paper is meant strictly for internal school circulation. It is to be distributed among students for quiz preparation only.
2. The duration of the online quiz will be 10 minutes.
3. **The student should enter for exam along with his School Admission No., Email ID of Parents or Self and have to sign the attendance sheet.**
4. Email of Parents or students is to be filled by student in quiz form only for on line certificate generation in easy manner.
5. Quiz link will be sent to coordinator after having telephonic communication.
6. **The next batch will start after all students from the previous batch have submitted and exited from exam room.**
7. Photo (MIN.4) AND 1 video of the exam room should also be enclosed taken FROM GPS CAMERA MODE .
8. **Quiz would be taken in batch mode and there would be gap of 10 minutes between each batch.**
9. After submission of quiz form close the quiz tab/ browser window for better results.
10. **Never refresh between the running quiz.**
11. **Email the attendance sheet signed, verified and school stamped by invigilator.**

GLOBAL WARMING

1. Which gas is the largest contributor to the anthropogenic greenhouse effect?

- A) Methane (CH_4)
- B) Nitrous oxide (N_2O)
- C) Carbon dioxide (CO_2)
- D) Ozone (O_3)

Answer: C

2. Which of the following is NOT a greenhouse gas?

- A) Carbon dioxide
- B) Methane

- C) Nitrogen (N₂)
- D) Nitrous oxide

Answer: C

3. What is the main cause of global warming?

- A) Deforestation only
- B) Volcanic eruptions
- C) Burning of fossil fuels and human activities
- D) Ocean currents

Answer: C

4. The 'greenhouse effect' gets its name because:

- A) It was discovered in a greenhouse
- B) Gases trap heat like glass in a greenhouse
- C) Plants produce greenhouse gases
- D) It was first studied in greenhouse farms

Answer: B

5. Which international agreement aims to limit global warming to 1.5°C above pre-industrial levels?

- A) Kyoto Protocol
- B) Montreal Protocol
- C) Paris Agreement
- D) Rio Declaration

Answer: C

6. Which of the following is a direct consequence of global warming?

- A) Rising sea levels
- B) Increased snowfall worldwide
- C) Decrease in carbon dioxide
- D) Cooling of oceans

Answer: A

7. The layer of the atmosphere that contains most greenhouse gases is the:

- A) Stratosphere
- B) Mesosphere
- C) Troposphere
- D) Thermosphere

Answer: C

8. Which gas released by paddy fields and cattle contributes to global warming?

- A) Carbon dioxide
- B) Methane
- C) Sulfur dioxide
- D) Nitrogen

Answer: B

9. What does 'carbon footprint' mean?

- A) The mark left by carbon powder
- B) The total greenhouse gas emissions caused by a person or activity
- C) A method of measuring soil carbon
- D) The weight of carbon in a product

Answer: B

10. Which human activity contributes most to increasing CO₂ in the atmosphere?

- A) Burning fossil fuels (coal, oil, gas)
- B) Swimming
- C) Planting trees
- D) Drinking water

Answer: A

11. Global warming leads to melting of glaciers and ice sheets on land. This results in:

- A) More land area
- B) Rise in sea level
- C) Decrease in ocean temperature
- D) Increase in snowfall

Answer: B

12. The term 'global warming potential (GWP)' compares the heat-trapping ability of a gas to:

- A) Methane
- B) Ozone
- C) Water vapour
- D) Carbon dioxide

Answer: D

13. Which of these actions helps to reduce carbon dioxide emissions?

- A) Using more air conditioning
- B) Using public transport instead of private cars
- C) Burning crop residue
- D) Increasing plastic use

Answer: B

14. The phenomenon where cities are hotter than surrounding rural areas due to human activities is called:

- A) Greenhouse effect
- B) El Niño
- C) Urban heat island effect
- D) Thermal pollution

Answer: C

15. Which of the following is a renewable way to reduce dependence on fossil fuels?

- A) Coal power plant

- B) Natural gas pipeline
- C) Solar energy
- D) Petroleum refinery

Answer: C

16. Which gas is responsible for destroying the ozone layer?

- A) Carbon dioxide
- B) Methane
- C) Chlorofluorocarbons (CFCs)
- D) Nitrogen

Answer: C

17. What is 'climate change'?

- A) Daily changes in weather
- B) Long-term shifts in Rainfall, temperature and weather patterns
- C) Change of seasons
- D) Rainfall in dry regions

Answer: B

18. Which of the following is an effect of global warming on biodiversity?

- A) Increase in polar bear populations
- B) Coral bleaching due to rising ocean temperatures
- C) Faster plant growth worldwide
- D) Decrease in migration of birds

Answer: B

RENEWABLE ENERGY

19. Which of the following is a renewable source of energy?

- A) Coal
- B) Natural gas
- C) Solar energy
- D) Petroleum

Answer: C

20. Solar energy is converted into electricity using:

- A) Photovoltaic (solar) cells
- B) Wind turbines
- C) Hydroelectric dams
- D) Geothermal plants

Answer: A

21. Energy obtained from the heat inside the Earth is called:

- A) Solar energy
- B) Tidal energy

- C) Geothermal energy
- D) Wind energy

Answer: C

22. Which country leads the world in solar power capacity (as of recent years)?

- A) USA
- B) Germany
- C) China
- D) India

Answer: C

23. The energy in wind is a form of which kind of energy?

- A) Chemical energy
- B) Nuclear energy
- C) Kinetic energy
- D) Heat energy

Answer: C

24. Biogas is primarily composed of:

- A) Carbon dioxide and hydrogen
- B) Methane and carbon dioxide
- C) Oxygen and nitrogen
- D) Sulfur dioxide and methane

Answer: B

25. Which of the following is NOT a renewable energy source?

- A) Hydropower
- B) Wind energy
- C) Solar energy
- D) Coal

Answer: D

26. Bhadla Solar Park, one of the largest solar parks in the world, is located in which Indian state?

- A) Gujarat
- B) Tamil Nadu
- C) Rajasthan
- D) Maharashtra

Answer: C

27. Tidal energy is generated from:

- A) Ocean waves only
- B) Movement of tides caused by gravitational pull of the Moon
- C) River currents
- D) Underground water

Answer: B

28. The International Solar Alliance (ISA), launched by India and France in 2015, promotes:

- A) Nuclear energy
- B) Solar energy deployment globally
- C) Coal power plants
- D) Hydropower dams

Answer: B

29. Which fuel is produced by fermenting organic waste and used as a clean cooking fuel?

- A) LPG
- B) Diesel
- C) Kerosene
- D) Biogas

Answer: D

30. A wind turbine converts wind energy into:

- A) Chemical energy
- B) Heat energy
- C) Electrical energy
- D) Nuclear energy

Answer: C

31. Which of these energy sources does NOT produce direct greenhouse gas emissions during operation?

- A) Solar power plant
- B) Natural gas plant
- C) Coal power plant
- D) Diesel generator

Answer: A

32. Hydropower generates electricity using:

- A) Steam from hot springs
- B) Flowing or falling water
- C) Burning of water plants
- D) Pressure of seawater

Answer: B

33. 'PM Kusum' scheme in India is related to:

- A) Biogas promotion
- B) Solar pumps for farmers
- C) Wind energy in coastal areas
- D) Nuclear power for villages

Answer: B

34. The sun's energy reaches Earth mainly in the form of:

- A) Sound waves

- B) Radio waves
- C) Electromagnetic radiation (light and heat)
- D) X-rays only

Answer: C

POLLUTION & WASTE MANAGEMENT

35. Which of the following is an example of biodegradable waste?

- A) Plastic bags
- B) Glass bottles
- C) Vegetable peels
- D) Styrofoam

Answer: C

36. The 3R principle of waste management stands for:

- A) Recycle, Remove, Reduce
- B) Remove, Restore, Renew
- C) Replace, Refill, Reclaim
- D) Reduce, Reuse, Recycle

Answer: D

37. Which type of pollution is caused by excessive use of chemical fertilizers and pesticides?

- A) Air pollution
- B) Soil pollution
- C) Noise pollution
- D) Thermal pollution

Answer: B

38. The main cause of eutrophication in water bodies is:

- A) Excess oxygen
- B) Excess nutrients (nitrates and phosphates) from runoff
- C) Decrease in fish population
- D) Plastic waste

Answer: B

39. PM2.5 refers to:

- A) A type of plastic
- B) A water pollutant
- C) A pesticide
- D) Particulate matter smaller than 2.5 micrometres that causes air pollution

Answer: D

40. Acid rain is caused mainly by emissions of:

- A) Carbon dioxide and methane
- B) Sulfur dioxide and nitrogen oxides

- C) Oxygen and hydrogen
- D) Water vapour and dust

Answer: B

41. Which Indian initiative focuses on making cities open-defecation free and managing solid waste?

- A) Swachh Bharat Mission
- B) Namami Gange
- C) Smart Cities Mission
- D) AMRUT

Answer: A

42. Electronic waste (e-waste) is harmful because it contains:

- A) Excess paper
- B) Toxic metals like lead, mercury, and cadmium
- C) Biodegradable material
- D) Only plastic parts

Answer: B

43. Which colour bin is used for collecting dry/recyclable waste in many Indian cities?

- A) Green
- B) Red
- C) Blue
- D) Yellow

Answer: C

44. Noise pollution exceeding which level (in decibels) is generally considered harmful to humans?

- A) 30 dB
- B) 50 dB
- C) 75 dB
- D) 85 dB

Answer: D

45. The process of converting organic waste into compost is called:

- A) Composting
- B) Incineration
- C) Landfilling
- D) Pyrolysis

Answer: A

46. Which river is widely considered the most polluted river in India, largely due to untreated sewage and industrial effluents?

- A) Ganga
- B) Yamuna
- C) Sabarmati
- D) Godavari

Answer: B

47. Plastic bags are harmful because:

- A) They are very heavy
- B) They are non-biodegradable and choke drainage and animals
- C) They are too expensive
- D) They conduct electricity

Answer: B

48. The Great Pacific Garbage Patch is mainly composed of:

- A) Biodegradable food waste
- B) Ship fuel
- C) Plastic debris
- D) Dead marine animals

Answer: C

49. Which gas released from vehicle exhaust combines with hemoglobin in blood, reducing oxygen supply?

- A) Carbon dioxide
- B) Carbon monoxide
- C) Sulfur dioxide
- D) Nitrogen dioxide

Answer: B

50. Single-use plastics are those that are:

- A) Made from recycled material
- B) Reused multiple times
- C) Biodegradable in water
- D) Used only once and then discarded

Answer: D

51. Light pollution is best described as:

- A) Pollution caused by bright coloured paints
- B) Excessive artificial light that disrupts ecosystems and human health
- C) Sunlight entering homes
- D) Reflection from water bodies

Answer: B

52. Which process treats wastewater to make it safe before releasing into water bodies?

- A) Distillation
- B) Evaporation
- C) Sewage treatment
- D) Chlorination only

Answer: C

TREE PLANTATION & FORESTS

53. Trees help reduce global warming by:

- A) Releasing carbon dioxide
- B) Absorbing carbon dioxide and releasing oxygen
- C) Producing methane
- D) Increasing soil erosion

Answer: B

54. The process by which plants make their food using sunlight is called:

- A) Respiration
- B) Transpiration
- C) Photosynthesis
- D) Pollination

Answer: C

55. The Van Mahotsav festival in India is celebrated to promote:

- A) Tree plantation
- B) Wildlife conservation
- C) Water conservation
- D) Soil health

Answer: A

56. Which type of forest is found near the equator and receives heavy rainfall throughout the year?

- A) Temperate forest
- B) Coniferous forest
- C) Tropical rainforest
- D) Deciduous forest

Answer: C

57. Deforestation leads to which of the following?

- A) Increase in oxygen levels
- B) More rainfall
- C) Decrease in CO₂ levels
- D) Loss of biodiversity and soil erosion

Answer: D

58. The Amazon Rainforest is often called 'the lungs of the Earth' because it:

- A) Has many lung-shaped leaves
- B) Produces a large amount of oxygen and absorbs CO₂
- C) Is shaped like a human lung
- D) Has animals that breathe loudly

Answer: B

59. The Chipko Movement in India was about:

- A) Hugging trees to prevent them from being cut
- B) Planting trees in cities
- C) Saving water in forests
- D) Protecting forest animals

Answer: A

60. Which tree is known as the 'Miracle Tree' due to its multipurpose uses?

- A) Banyan
- B) Neem
- C) Moringa (Drumstick tree)
- D) Peepal

Answer: C

61. Social forestry refers to:

- A) Forests owned by social media companies
- B) Planting trees on public and community lands to benefit society
- C) Ancient forests protected by tribes
- D) Private forest land

Answer: B

62. Mangrove forests are important because they:

- A) Protect coastlines from erosion and support marine biodiversity
- B) Provide timber for furniture
- C) Are used for agriculture
- D) Produce coffee and cocoa

Answer: A

63. The national tree of India is:

- A) Peepal
- B) Neem
- C) Banyan
- D) Mango

Answer: C

64. Which of the following is a benefit of urban trees?

- A) They increase traffic congestion
- B) They reduce heat, filter air, and improve mental well-being
- C) They damage buildings
- D) They reduce biodiversity

Answer: B

WILDLIFE CONSERVATION

65. Which organization maintains the Red List of threatened species?

- A) World Wildlife Fund (WWF)

- B) International Union for Conservation of Nature (IUCN)
- C) United Nations Educational, Scientific and Cultural Organization (UNESCO)
- D) United Nations Environment Programme (UNEP)

Answer: B

66. Project Tiger was launched in India in which year?

- A) 1965
- B) 1992
- C) 1980
- D) 1973

Answer: D

67. The national animal of India is:

- A) Lion
- B) Elephant
- C) Bengal Tiger
- D) Snow Leopard

Answer: C

68. Which of the following is a critically endangered species found in India?

- A) Common sparrow
- B) Buffalo
- C) House crow
- D) Great Indian Bustard

Answer: D

69. A 'biosphere reserve' is an area designated to:

- A) Mine minerals sustainably
- B) Conserve biodiversity while allowing sustainable human use
- C) Build eco-tourism hotels only
- D) Promote industrial farming

Answer: B

70. What is poaching?

- A) Cooking eggs in hot water
- B) Illegal hunting or capturing of wild animals
- C) Collecting forest herbs for medicine
- D) Legal hunting with licence

Answer: B

71. Jim Corbett National Park, India's first national park, was established in:

- A) 1905
- B) 1973
- C) 1947
- D) 1936

Answer: D

72. Which endangered migratory bird was famous for visiting Keoladeo Ghana National Park (Bharatpur) in winter, but has not been seen there since the early 2000s?

- A) Flamingo
- B) Peacock
- C) Siberian Crane
- D) Vulture

Answer: C

73. Ex-situ conservation means:

- A) Protecting species in their natural habitat
- B) Conserving species outside their natural habitat (zoos, seed banks)
- C) Building walls around forests
- D) Hunting for conservation funds

Answer: B

74. Which of the following best explains 'biodiversity'?

- A) The variety of living organisms in an area
- B) The number of trees in a forest
- C) Diversity of human cultures
- D) Different types of soil

Answer: A

75. The Kaziranga National Park in Assam is famous for protecting the:

- A) Bengal Tiger
- B) Indian one-horned rhinoceros
- C) Asiatic Lion
- D) Snow Leopard

Answer: B

76. Which national park in Kerala, also a Tiger Reserve, is famous for its elephants?

- A) Gir Forest National Park
- B) Rajaji National Park
- C) Periyar National Park
- D) Nagarhole National Park

Answer: C

77. The Gir Forest National Park is the only natural habitat of:

- A) Bengal Tiger
- B) Asiatic Lion
- C) Cheetah
- D) Snow Leopard

Answer: B

78. Which international agreement regulates trade in endangered species of animals and plants?

- A) Ramsar Convention
- B) Bonn Convention
- C) CBD
- D) CITES

Answer: D

SUSTAINABLE LIVING

79. Sustainable development means:

- A) Development that only benefits rich countries
- B) Meeting present needs without compromising the ability of future generations to meet their own needs
- C) Building as many factories as possible
- D) Using all natural resources quickly

Answer: B

80. Which of the following is an example of sustainable living?

- A) Leaving lights on when not in use
- B) Carrying a cloth bag instead of using plastic bags
- C) Buying new electronic items every year
- D) Wasting food regularly

Answer: B

81. The United Nations Sustainable Development Goals (SDGs) consist of how many goals?

- A) 10
- B) 15
- C) 17
- D) 20

Answer: C

82. Rainwater harvesting is used to:

- A) Increase rainfall
- B) Collect and store rainwater for future use
- C) Irrigate forests automatically
- D) Produce electricity from rain

Answer: B

83. Which of the following is a water-saving practice?

- A) Washing vehicles with running hose
- B) Filling swimming pools daily
- C) Leaving taps open while brushing
- D) Drip irrigation in farming

Answer: D

84. Energy-efficient LED bulbs save energy compared to incandescent bulbs. Approximately how much more efficient are they?

- A) 2 times
- B) 5 times
- C) Up to 8–10 times
- D) Same efficiency

Answer: C

85. The concept of 'zero waste' means:

- A) Producing no product
- B) Designing systems so all waste is reused, reducing what goes to landfills
- C) Throwing waste in zero-waste bins
- D) Stopping all manufacturing

Answer: B

86. Which label on products indicates they have been produced in an environmentally responsible way?

- A) Eco-label / Green label
- B) BIS mark
- C) ISO 9000
- D) Agmark

Answer: A

87. Organic farming differs from conventional farming because it:

- A) Uses more chemical pesticides
- B) Avoids synthetic chemicals and promotes natural soil health
- C) Produces lower quality food
- D) Requires more water always

Answer: B

88. World Environment Day is celebrated every year on:

- A) April 22
- B) March 22
- C) October 16
- D) June 5

Answer: D

89. A carbon-neutral activity means:

- A) It produces no carbon at all
- B) The carbon emissions are balanced by an equal amount of carbon removal/offset
- C) It uses only nuclear energy
- D) It is done underground

Answer: B

90. Which practice reduces food waste and supports sustainable living?

- A) Buying in large quantities and discarding excess

- B) Meal planning and composting food scraps
- C) Ordering food online every day
- D) Refrigerating all food for months

Answer: B

WATER CONSERVATION

91. What percentage of Earth's water is freshwater?

- A) About 50%
- B) About 25%
- C) Less than 3%
- D) About 10%

Answer: C

92. World Water Day is observed on:

- A) March 22
- B) June 5
- C) April 22
- D) October 16

Answer: A

93. The main source of water for Himalayan Rivers such as the Ganga is:

- A) Glaciers and snowmelt
- B) Ocean water
- C) Groundwater only
- D) Rainwater collected in deserts

Answer: A

94. Eutrophication is a process where excess nutrients in water cause:

- A) Decrease in algae
- B) Purification of water
- C) Increase in fish population
- D) Rapid algae growth that depletes oxygen, harming aquatic life

Answer: D

95. Which of the following best conserves groundwater?

- A) Over-extracting water for irrigation
- B) Increasing concrete surfaces
- C) Rainwater harvesting and recharge pits
- D) Cutting trees near water sources

Answer: C

96. The 'Jal Jeevan Mission' launched by the Government of India aims to:

- A) Build dams across all rivers
- B) Provide tap water connections to every rural household

- C) Sell bottled water to poor families
- D) Recycle industrial water only

Answer: B

97. Drip irrigation is better than flood irrigation because:

- A) It delivers water directly to plant roots, reducing wastage
- B) It uses more water
- C) It is cheaper to install
- D) It requires no electricity

Answer: A

98. Which of the following is a water pollutant from industrial sources?

- A) Rainwater
- B) Filtered air
- C) Oxygen
- D) Heavy metals like mercury and lead

Answer: D

99. The Ramsar Convention is related to the conservation of:

- A) Wetlands
- B) Forests
- C) Coral reefs
- D) Mountain ecosystems

Answer: A

100. What is the most water-efficient way to water a garden?

- A) Sprinkler in the afternoon sun
- B) Flooding the garden daily
- C) Drip irrigation or watering at the base of plants in the morning
- D) Using a hosepipe in the wind

Answer: C
